Fire Pump Packages

SPP Packaged Fire Pumping Systems

Detailed Specifications

- Built in accordance with NFPA Pamphlet 20
- Fully Prefabricated
- Internally piped and wired
- Factory Installed Tamper Switches
- Factory Tested
- Single Source Responsibility
- Automatic or Manual Operation

SPP PUMPS INC.

Detailed Description

SPP packaged fire pumping systems save time, labor and change orders on site. Cost-effective, completely self-contained skidded or housed units precisely fit specified areas, and require only system piping connections and a single point electrical hook-up. Housings are built to accommodate required environments with lighting, heating, ventilation, insulation, weather protection, alarms and easy access opening.

Before shipment, each pump station must pass SPP's unique system testing and quality control standards. After installation, users are supported by a network of factory trained service representatives qualified to provide on-site system service and user training. All SPP packages meet OSHA and Federal Regulation 29 CFR 1910.399 and NFPA Pamphlet 70 National Election Code (NEC) for third party certification. Excellent design, quality construction and knowledgeable personnel provide the reliability required for a SPP Fire Protection System. SPP is ISO 9001 certified and our test rig is UL Listed and FM approved

Customization Options

SPP can design your fire pump solution with electric or diesel drivers. We offer inline, end suction, horizontal split case, or vertical turbine pumps to meet site or flow requirements.

Assessed to ISO 9001:2000
Certificate No. 111
